Entertainment and Performance Event - Outdoor Fixed-Site

Category- and Venue-Specific Information Template

Application Reference	[Assigned by STERAS]
Event Category	Entertainment and Performance Event
Venue Setting	Outdoor Fixed-Site
Template Version	STERAS-T02-ENT-OF-v1.0

Purpose: Complete this template together with the STERAS Core Event Application. Do not repeat general event, organiser, programme, crowd-management, security, medical, evacuation or general severe-weather information already provided in the Core template. Answer only the additional questions below that arise from an entertainment/performance event held at one outdoor site.

Risk focus for this template: outdoor stage and production safety, speaker/lighting structures, temporary electrical supply, weather exposure of technical equipment, wind loading, ground conditions, audience-to-stage separation, perimeter control and special effects.

Extraction rule: Type answers only inside the Organiser Response cells. Keep each response in its original field so STERAS can map it reliably to the auto-filled application form.
