Sports and Recreational Event - Outdoor Fixed-Site

Category- and Venue-Specific Information Template

Application Reference	[Assigned by STERAS]
Event Category	Sports and Recreational Event
Venue Setting	Outdoor Fixed-Site
Template Version	STERAS-T05-SPT-OF-v1.0

Purpose: Complete this template together with the STERAS Core Event Application. Do not repeat general event, organiser, operational, crowd-management, medical or evacuation information already provided in the Core template. Answer only the additional questions below that arise from this sports and recreational event category and outdoor fixed-site venue setting.

Risk focus for this template: participant injuries, outdoor playing-surface and ground conditions, sports equipment and apparatus, heat/lightning/weather exposure, participant-spectator separation, temporary structures and fixed-site access hazards.

Extraction rule: Type answers only inside the Organiser Response cells. Keep each response in its original field so STERAS can map it reliably to the auto-filled application form.
