Cultural, Heritage and Festival Event - Outdoor Route-Based

Category- and Venue-Specific Information Template

Application Reference	[Assigned by STERAS]
Event Category	Cultural, Heritage and Festival Event
Venue Setting	Outdoor Route-Based
Template Version	STERAS-T09-CUL-OR-v1.0

Purpose: Complete this template together with the STERAS Core Event Application. Do not repeat general event, organiser, operational, crowd-management, medical or evacuation information already provided in the Core template. Answer only the additional questions below that arise from this cultural, heritage and festival event category and outdoor route-based venue setting.

Risk focus for this template: cultural processions and ceremonial movement, cultural sensitivities, floats and procession vehicles, route hazards, road and traffic interaction, spectator separation, ceremonial stopping points, fire/special effects and participant accountability along the route.

Extraction rule: Type answers only inside the Organiser Response cells. Keep each response in its original field so STERAS can map it reliably to the auto-filled application form.
