

STERAS M1–M5

End-to-End Scenario

Malaysia Tourism Storytelling Showcase 2026 · KLCC Convention Centre · 600 attendees

Application	Assessment	Decision	Controls	Analytics
v1 submitted	28 / Medium	Approved	3 public · 1 resubmit	Complete coverage

This pack records a realistic fictitious demonstration. It is not evidence of a real permit or government approval.

THE STORY

One record, five connected modules

Module	What happens	What to show
M1	Choose scenario, upload combined application, extract, verify, submit	Template recommendation, 100% extraction, 18/18 evidence
M2	Acquire context, ask MiniMax, validate, apply hard rules, calculate resources	Eight categories, weather evidence, official 28 / Medium, seven resources
M3	Admin review, officer assignment, score review, final approval, controls	Four authorities, unanimous approval, 13 verified Stage 1 documents
M4	Report, assess, respond, resolve	MiniMax incident assessment and append-only response history
M5	Read latest valid records into privacy-safe reports	Complete source coverage, report cards, export controls

Presenter line

“STERAS does not treat AI output as the decision. AI proposes; validated rules, authority review, immutable records and Admin approval form the auditable decision chain.”

Structured application and evidence

The screenshot displays the STERAS application interface. At the top, the STERAS logo is on the left, and navigation links for Dashboard, New Event, My Events, and Incidents are in the center. On the right, the user is identified as 'Organizer 1' with a 'Sign out' button. The main content area is divided into sections for evidence submission. The first section, 'High-risk or large-scale event evidence', includes a text box for 'Why this does not apply *' with the example text 'The event has not been classified as high-risk or large-scale.' The second section, 'Ticketing evidence', is marked with a 'T01-DOC-09 Scenario' tag and a 'Not applicable' dropdown. It also has a 'Why this does not apply *' text box with the example text 'Admission is free and no ticketing or attendee registration is used.' Below these is the 'Organizer contact' section with three input fields: 'Organizer name *' (filled with 'Aina Rahman'), 'Email *' (filled with 'aina.rahman@example.com'), and 'Phone *' (filled with '+60 12-345 6789'). At the bottom right are three buttons: 'Cancel', 'Save draft', and 'Submit application'.

- Core + scenario documents are accepted as one combined PDF.
- The organiser reviews extracted fields and corrects suspicious or missing values.
- Canonical venue binding and evidence ownership are checked before submission.

Official AI-assisted assessment

The screenshot displays the STERAS Administration interface. The left sidebar contains navigation links: ADMIN WORKSPACE (LIVE), M3 - AUTHORITY APPROVAL (Dashboard, Application queue, Incidents), M1 - USER & EVENT MGMT (User accounts, Venues), M5 - ANALYTICS (Reports), and SYSTEM (Audit log). The main content area is titled 'Review · Malaysia Tourism Storytelling Showcase 2026' and shows the application status as 'APPROVED' with a 'MEDIUM RISK' label. The application details include: Organiser (Aina Rahman), Email (aina.rahman@example.com), Phone (+60 12-345 6789), Venue (KLCC Convention Centre), and Required authorities (PDRM, BOMBA, KKM, DBKL). The event details for 'SUBMITTED VERSION 1' include: Event type (concert), Event date (3 Sept 2026, 11:30 pm - 4 Sept 2026, 2:30 am), Venue address (Kuala Lumpur City Centre, 50088 KL), Capacity / expected attendance (14,000 / 600), Environment (indoor · covered · seated), Venue coordinates (3.1578, 101.7117), and Description (A seated indoor showcase combining Malaysian cultural storytelling and acoustic music in a controlled four-hour programme.).

- MiniMax-M3 returned all eight numeric category proposals.
- OpenWeather supplied a fresh measured snapshot; no placeholder weather was used.
- Human reviews and deterministic hard rules produced the official result: 28 / Medium.

Deterministic resource recommendation

Risk Factor	Score	Severity	Description
Medical and health-system capacity	9	MEDIUM	Medical plan present, nearest hospital 5-10 minutes, history shows zero presentations or transfers. Hard-floor keeps likelihood at 3 and severity at 3; small vulnerable share (10%) does not warrant escalation with current data.
Security, behaviour and CBRN	12	MEDIUM	Hard-floor sets likelihood at 4 and severity at 3. Low attendance, no rivalry/tension, weekday, seated ticketed context (ticketedEntry false but seating reduces crush risk), alcohol not served. No threat intelligence provided.
Transport and accessibility	6	MEDIUM	Traffic management plan present, venue emergency access verified, very low utilization reduces transit strain. Hard-floor of 3x2 retained. Nearest hospital access 5-10 minutes supports emergency response.

AI proposal · MiniMax-M3 status: success
The assessment retains the AI proposal as provenance; the displayed score is calculated by the deterministic M2 rules.

Officer assignment

Malaysia Tourism Storytelling Showcase 2026 · KLCC Convention Centre
Venue state: Kuala Lumpur · Required: PDRM, BOMBA, KKM, DBKL

Final decision recorded: Approved.

Approved

Checklist
Default-checked by lowest workload + state scope. Swap to a backup officer by clicking a different radio button.

PDRM Assigned Decision recorded 1 eligible officer(s)

Officer: N7665q4yDMWbxAyeb69pWh9UHL2
Assigned by: qsOkeFy9pcZaeeymxcsClpAUo6D3 · Sep 3, 2026, 10:45 PM
Decision: Approved · Sep 3, 2026, 10:52 PM
Reason: Reviewed the complete official assessment, submitted evidence and resource recommendation; the stated controls are appropriate for this demonstration event.

BOMBA Assigned Decision recorded 1 eligible officer(s)

Officer: dNeH2N8Gj2UvJ5SzsSIH1HkxiwA2
Assigned by: qsOkeFy9pcZaeeymxcsClpAUo6D3 · Sep 3, 2026, 10:45 PM
Decision: Approved · Sep 3, 2026, 10:52 PM
Reason: Reviewed the complete official assessment, submitted evidence and resource recommendation; the stated controls are appropriate for this demonstration event.

KKM Assigned Decision recorded 1 eligible officer(s)

Officer: vh6GIPP2wkWwypG0zrziGzCw593
Assigned by: qsOkeFy9pcZaeeymxcsClpAUo6D3 · Sep 3, 2026, 10:45 PM
Decision: Approved · Sep 3, 2026, 10:52 PM
Reason: Reviewed the complete official assessment, submitted evidence and resource recommendation; the stated controls are appropriate for this demonstration event.

- PDRM, BOMBA, KKM and DBKL each reviewed all eight categories.

- Officer records are recommendations; Admin second review owns the final decision.

- The public event projection is created only after final approval.

Published event-control checklist

The screenshot displays the STERAS Admin Workspace interface. On the left is a dark sidebar with navigation links: ADMIN WORKSPACE (LIVE), M3 — AUTHORITY APPROVAL (Dashboard, Application queue, Incidents), M1 — USER & EVENT MGMT (User accounts, Venues), M5 — ANALYTICS (Reports), and SYSTEM (Audit log). The main content area shows the 'Event control list' for 'Malaysia Tourism Storytelling Showcase 2026 · KLCC Convention Centre'. It includes a 'Back to application' link, a status 'Approved' with 'Control list: published', and buttons for 'Load cached proposal' and 'Regenerate'. A message states 'No cached proposal items. Click "Regenerate" to re-fetch.' Below is a 'Committed list' section, noted as 'Stored on the event doc; organizer sees this in OrganizerEventControls', listing four items: PDRM (Crowd Control and Security Deployment Plan, 3 Stage 1 req(s)), BOMBA (Fire Safety and Evacuation Compliance, 3 Stage 1 req(s)), KKM (Public Health and Sanitation Compliance, 3 Stage 1 req(s)), and DBKL (Venue Use and Structural Compliance, 4 Stage 1 req(s)). The user 'STERAS Admin ... Admin administrator' is logged in.

- MiniMax proposed one control for every required authority.

- Admin explicitly committed the four-item list.

- Thirteen Stage 1 documents were submitted and independently verified.

Malaysia Tourism Storytelling Showcase 2026

event control discrepancy - 9/3/2026, 11:30:13 PM

resolved

Malaysia Tourism Storytelling Showcase 2026

resolved

The published DBKL image shows waste bins instead of the approved stage and barrier layout, so the required venue setup cannot be verified.

Location

KLCC Convention Centre

Severity

high

AI assessment

Event control discrepancy at KLCC Convention Centre: the published DBKL image does not match the approved stage and barrier layout, showing waste bins instead. This indicates either an unauthorized substitution or a documentation/rendering error, meaning the required venue setup cannot be verified against the approved safety plan. With 600 attendees expected, unverifiable stage and barrier configuration poses tangible crowd safety, ingress/egress, and regulatory compliance risks. Immediate action is required to obtain the correct, approved image, verify the on-site layout, and confirm compliance with DBKL requirements before event commencement - Immediate action required

Evidence

None supplied

Final resolution

Confirmed true: the incorrect waste-bin image has been withdrawn, and the organizer must upload a verified stage and barrier image for fresh review.

Append-only history

incident submitted

9/3/2026, 11:30:13 PM

Event Control discrepancy report submitted.

assign internal

9/3/2026, 11:34:29 PM

Assigned Venue operations: Immediate internal verification assigned to inspect the stage and barrier setup against the approved floor plan.

record response

9/3/2026, 11:35:17 PM

Site team inspected the venue and confirmed that the uploaded DBKL image was incorrect and did not show the approved stage and barrier layout.

resolve

9/3/2026, 11:36:02 PM

Final resolution: Confirmed true: the incorrect waste-bin image has been withdrawn, and the organizer must upload a verified stage and barrier image for fresh review.

- A public Stage 2 discrepancy becomes a current-version M4 incident.
- MiniMax classifies severity and immediate-action need.
- Resolution retains append-only history, withdraws the bad public image and requires resubmission.

Privacy-safe operational analytics

- Only latest valid records enter the portfolio.
- Source coverage is complete and warnings are empty for this scenario.
- Private narratives, evidence paths, contact details and internal notes stay out of reports.

RESULT

What the demonstration proves

Boundary	Verified result
Input integrity	Version-owned documents, canonical venue identity and complete all-hazards declarations
AI safety	Invalid/unavailable output fails closed; accepted proposals retain model and schema provenance
Determinism	Hard-rule floors, weighted scoring and resource calculations reproduce from stored inputs
Human authority	Append-only reviews and Admin final decision remain distinct from AI proposals
Privacy	Organizer/public projections exclude internal rationale, restricted evidence and personal data
Operations	M4 history and M5 analytics connect to the same current immutable event generation
