

M3 USE CASE DIAGRAM REVIEW

确认要改的内容，以及可以让你自己决定的建议

文件：Authority Approval and Notification Module

日期：9 August 2026

状态：可以直接发给队友

先说结论：整体的 M3 flow 是 okay 的。下面这些是我觉得应该改的内容，尤其是 MiniMax M3 generate event control list 这一点。Optional 的部分我另外分出来，你可以自己决定要不要放进去。

确认要改的内容

1. MiniMax M3 要继续负责 generate event control list

我们的目标本来就是使用 MiniMax M3 API generate proposed event control list，所以 MiniMax actor 和 Generate Event Control List 这个 use case 都要保留。

请从 Final Approve Application 用 <<include>> 连接去 Generate Event Control List。MiniMax M3 API 继续和 Generate Event Control List 直接连接。生成之后，还是由 Admin review、edit 和 finalise 这个 list。

FR-M3-16 也要一起改，不然 FR 和 diagram 会对不上：

The system shall send the approved event application, official risk assessment, safety-resource recommendations, and relevant control rules or guidelines to MiniMax M3 to generate a proposed event control list.

2. 加入 officer assignment，但不用把每个内部 step 都画出来

请加入 Assign Authority Officers，并且直接连接 Admin。

Modify Officer Selection 用 <<extend>> 连接 Assign Authority Officers，因为只有 Admin 想更改 default selection 的时候才会发生。

List Authenticated Authority Officers 和 Default-Select Officers by Venue State 不需要画成独立 use case。它们可以留在 FR 和 use case description 里面，当作 Assign Authority Officers 的内部步骤。

Admin - Assign Authority Officers
Modify Officer Selection --<<extend>>--> Assign Authority Officers

3. Reject application 时要记录 reason 和 suggestion

所有 Reject Application use case 都应该 <<include>> Record Rejection Reason and Suggestion, 包括 Admin initial review、Admin second review 和 Authority Officer review。

Attach Authority Officer Feedback 可以 <<extend>> Admin 的 Reject Application, 因为只有需要使用 officer feedback 的时候才会发生。

```
Reject Application --<<include>>--> Record Rejection Reason and Suggestion
Attach Authority Officer Feedback --<<extend>>--> Reject Application
```

4. Application result 继续从 organiser 的角度表达

Receive Result of Event Application 保留, 不需要改成 Notify Organiser。我们希望这里是从 Event Organiser 的角度来写。

另外加入 View Application Result and Feedback, 并且直接连接 Event Organiser。这样 organiser 收到结果后, 可以查看 decision、rejection reason、suggestion 和相关 feedback。

```
Event Organiser - Receive Result of Event Application
Event Organiser - View Application Result and Feedback
```

5. Authority Officer approve 前要先确认资料已经看完

Authority Officer 的 Approve Application 应该 <<include>> Confirm All Required Materials Reviewed。View Application、View Evidence 和 View Assessment 不需要另外拆成 use case。

```
Approve Application --<<include>>--> Confirm All Required Materials Reviewed
```

6. Resource suggestion 改成 resource override

请使用 Override Resource Recommendation, 不要再用 Provide Resource-Planning Suggestion。它直接连接 Authority Officer, 并且 <<include>> Record Override Details and Reason。

FR-M3-22 建议一起改成：

```
The system shall allow an authorised officer to override a safety-resource recommendation. The system shall require an override reason and record the original value, revised value, officer ID, authority, date, and time for audit and reporting purposes.
```

这些东西维持不变

保留：Database-related use cases 要继续放在 diagram, 因为这是老师要求的。Receive Result of Event Application 继续从 organiser 的角度表达。MiniMax M3 API 继续作为 Generate Event Control List 的 external supporting actor。

Optional - 这些你可以自己决定

下面这些只是让 diagram 更清楚，不是这次一定要改的内容。

A. Use case 命名

Review Application Assigned 可以改成 Review Assigned Application。原本的名称还是看得懂，所以这个你自己决定。

B. 要不要明确写 Stage 1 和 Stage 2

可以把 Review/Approve/Reject Stage 1 Control Document 和 Confirm/Report Published Stage 2 Image 分开写。这样会比较容易对应 FR；如果你想让 diagram 简单一点，也可以继续使用比较 generic 的名称。

C. 要不要画出 Stage 2 image 被 report 后的处理

可以加入 Review Inaccurate Stage 2 Image Report、Confirm Report 和 Dismiss Report，然后连接去 Require Resubmission 或 Restore Document to Approved。不过相关 FR 还没 finalise，所以现在不放也可以。

D. Database use case 要不要换成比较清楚的名称

Database use cases 继续保留，不过名称可以改成 Record Application Review Result、Record Document Review Result、Save Finalised Event Control List 和 Update Control Document Status。

E. 一些 wording 和 spelling

可以顺便修正 Final Approve Application、Sanities Event Control Document、Reused Previous Event Item 和 Increase Count of Verify。这些只会让名称更自然，不会影响 flow。

Relationship checklist

Source use case / actor	Relationship	Target use case
Admin	association	Assign Authority Officers
Modify Officer Selection	<<extend>>	Assign Authority Officers
Final Approve Application	<<include>>	Generate Event Control List
MiniMax M3 API	association	Generate Event Control List
Reject Application	<<include>>	Record Rejection Reason and Suggestion
Attach Authority Officer Feedback	<<extend>>	Reject Application
Event Organiser	association	Receive Result / View Result and Feedback
Approve Application	<<include>>	Confirm All Required Materials Reviewed
Authority Officer	association	Override Resource Recommendation
Override Resource Recommendation	<<include>>	Record Override Details and Reason
